Palmer Johnson - PJ World

ECO-ADVENTURERS UNDER CONSTRUCTION

If you are tempted by the concept of luxury adventure, Burgess is offering for sale two "eco" explorer yachts currently under construction. Designed for fuel efficiency and minimal environmental impact, both vessels offer buyers the opportunity to customise elements of the yacht's interior and design.

PJ WORLD 82M, Palmer Johnson **Delivery date: 2012**

With its distinctive styling and muscular and purposeful presence, PJ World is destined to be another iconic Palmer Johnson design. This 82 metre yacht is well under way in Norway, with the hull and superstructure complete and due for delivery in 2012 with a customised owner's suite.

The PJ World will be capable of safe global operation even in extreme climatic conditions, able to traverse the most remote regions with minimal environmental impact, while providing absolute reliability and exceptional on board comfort with surprisingly low operating costs. Her Rolls-Royce designed hull combines comfort and safety with minimal noise and vibration, while her diesel electric propulsion system with Azipull thrusters delivers excellent fuel efficiency with optimal station-keeping and manoeuvring. A Nuvolari-Lenard designed interior provides a serene and luxurious environment for your adventures throughout the world.
