

# A Sardinian Summer

**Charl van Rooy** captures some of the latest superyachts on the Costa Smeralda this year

**A**mong the summer superyacht hotspots, Sardinia's Emerald Coast is arguably one the most breathtaking. Its vibrant sunrises and sunsets, east to west coastline orientation and ice blue waters form the perfect backdrop for a superyacht getaway. Home to some of the largest and newest yachts each season, August on the Italian island is a yachtspotter's paradise with just a few miles of coastline playing host to several billion dollars worth of superyacht masterpieces. I returned to my favourite yacht spotting destination this summer and here are just some of the photos I came home with.
